

WAM!NET® Info CenterSM

Manage all aspects of your SAVVIS Content Management and Distribution services from one interface.

Info Center puts all of the management functions for your WAM!NET services at your fingertips. Accessible online or through your Purple Box, Info Center allows you to quickly customize each WAM!NET service to your individual workflow and business rules.

Online management of your:

- User and group permissions
- WAM!NET® WorkSpaceSM volumes
- WAM!NET® Content StudioSM libraries
- Email notifications
- Trading partner permissions
- Electronic billing
- Directory listing
- WAM!NET® Internet GatewaySM accounts
- All web-based service features

Easily locate trading partners

Easily locate other users in the Directory, an up-to-date listing of the firms connected to the SAVVIS Content Exchange. Search by name, industry or location.

You control trading permissions

Your relationship with any trading partner can be easily managed in Info Center. Request new relationships with the click of a button. Set your account to automatically approve new requests or manually review all existing permission settings.

Track delivery in minutes

With Info Center, you can track your packages within minutes of being sent, allowing you to keep a close eye on daily deliveries. View real-time transaction information on individual packages or generate aggregate reports at your convenience.

Quickly determine delivery costs

Detailed reporting tools allow you to easily locate and organize transaction data by sender, recipient, file size

KEY FEATURES

- » Easily customize
- » User accounts track deliveries
- » In real-time quickly determine delivery costs

or job ID. Specify a bandwidth cost and easily determine the transaction charges to clients and internal departments.

Download data to accounting systems

Info Center provides real-time access to all of your account usage data, so you can maintain a clear picture of your usage costs before your monthly bill arrives. Download data directly to your system or view quick snapshots online through an easy to use reporting interface.

Manage user-based permissions

Info Center provides both user and group permissions, so you can flexibly manage which functions and volumes they have access to.

Automate deliveries and notifications

Info Center makes it easy to automate your workflow. Quickly set up Hot Folders with preset delivery destinations and customized settings. WAM!NET® Direct!SM, WAM!NET® Direct! IPSM and WAM!NET® WorkSpaceSM users can then drag and drop files without slowing down to fill out forms. Customize your notifications to alert any user by email when a package arrives.

Our Services

SAVVIS delivers a powerful suite of Digital Content Services that include Content Delivery, Content Exchange and Digital Studio. These services support the creation, production and management of all media assets, including print, music, film, video and games.

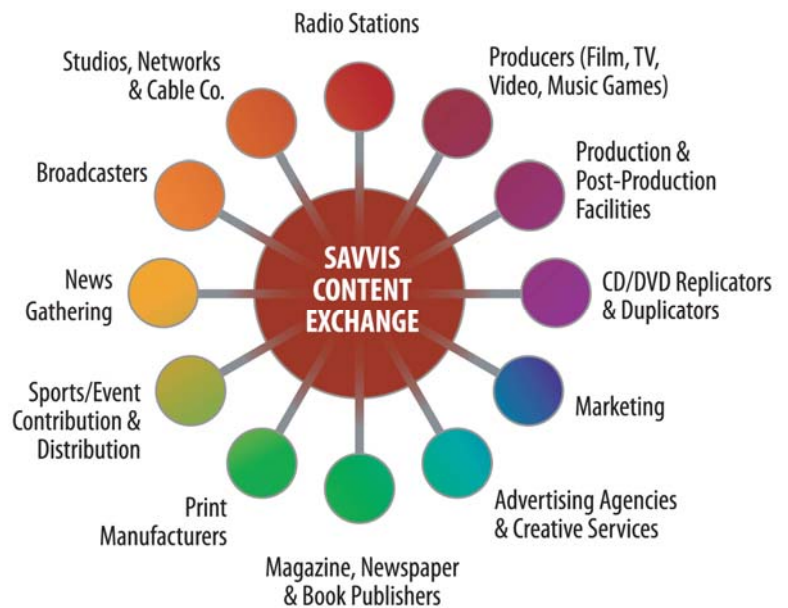

SAVVIS Content Delivery Services integrate a global IT infrastructure with patented traffic management software to optimize the performance of web-based applications and stream events like annual meetings and customer seminars.

The SAVVIS Content Exchange, based on WAMINET applications and services, enables global inter-enterprise workflows among owners, producers and manufacturers of digital media. This community of interest network (COIN) comprised of thousands of companies allows you to define dynamic workgroups, regardless of location, that can create, manage and move content through a secured platform.

Our Digital Studio Services provide production capabilities for all forms of digital media, delivered over the Internet, from music entertainment to corporate webcasts.

About SAVVIS

SAVVIS, Inc. (NASDAQ: SVVS) is a global IT utility services provider that focuses exclusively on IT solutions for businesses. With an IT service platform that extends to 47 countries, SAVVIS has over 5000 enterprise customers and leads the industry in delivering secure, reliable and scalable hosting, network and application services. These solutions enable customers to focus on their core business while SAVVIS ensures the quality of their IT systems and operations. SAVVIS' strategic approach combines virtualization technology, a global network and 24 data centers, and automated management and provisioning systems.
