

Reliable, Scalable, Secure

TeamSMS

Who are we?

A Service-Disabled Veteran-Owned Small Business Team

TeamSMS, guided by our prime contractor Systems Made Simple (SMS), is a team of top-notch businesses dedicated to delivering high-quality Managed Services. SMS has a 15+ year history of successful performance on numerous Government and commercial contracts. SMS is a premier software engineering firm specializing in developing and supporting software for government agencies and large commercial customers. SMS prides itself on providing its customers with the highest quality products and services available in the industry. Assembled by SMS, **TeamSMS** is comprised of highly skilled companies that bring a broad cross-section of IT expertise to the team to help you achieve the quality of service your business demands. As well, we bring together a diverse cultural team of proven SDVOSB, Veteran-Owned, Woman-Owned, Native American, Native Alaskan, 8(a) and small businesses to provide world-class IT services under the VETS GWAC contract.

At a glance. . .

Managed Services

Our Managed Services have been put in place to provide our federal agency customers with a broad and deep array of IT infrastructure capabilities in the spirit of "Infrastructure as a Service " (IaaS). This approach enables the agencies to focus on mission achievement and application performance, and NOT on the IT systems and operations. To do so, our Managed Services deliver enterprise-level hosting and data center services, bandwidth, security features, DR, tools and dashboarding to afford the agencies a clear view into what is actually going on at the operating system level. At the end of the day, the application must be available, secure and affordable. **TeamSMS** delivers on that promise, but with the additional value of choice, flexibility, control and scalability. That is what **TeamSMS** stands for!

For more information about **TeamSMS**, email ron.fishbeck@systemsmadesimple.com or call **315-382-0521**.
